Mechanicam vero duplicem Veteres constituerunt: Rationalem *quae per Demonstrationes accurate procedit, & Practicam. Ad practicam spectant Artes omnes Manuales, a quibus utique* Mechanica *nomen mutuata est. Cum autem Artifices parum accurate operari soleant, fit ut* Mechanica *omnis a* Geometria *ita distinguatur, ut quicquid accuratum sit ad* Geometriam *referatur, quicquid minus accuratum ad* Mechanicam. *Attamen errores non sunt Artis sed Artificum. Qui minus accurate operatur, imperfectior est Mechanicus, & si quis accuratissime operari posset, hic foret Mechanicus omnium perfectissimus.* NEWTON

La généralité que j'embrasse, au lieu d'éblouïr nos lumieres, nous découvrira plutôt les véritables loix de la Nature dans tout leur éclat, & on y trouvera des raisons encore plus fortes, d'en admirer la beauté & la simplicité. EULER

... ut proinde his paucis consideratis tota haec materia redacta sit ad puram Geometriam, quod in physicis & mechanicis unice desideratum. LEIBNIZ

The ARCHIVE FOR RATIONAL MECHANICS AND ANALYSIS nourishes the discipline of mechanics as a deductive, mathematical science in the classical tradition and promotes pure analysis, particularly in contexts of application. Its purpose is to give rapid and full publication to researches of exceptional moment, depth, and permanence.

Each memoir must meet a standard of rigor set by the best work in its field. Contributions must consist largely of original research; on occasion, an expository paper may be invited.

English, French, German, Italian, and Latin are the languages of the Archive. Authors are urged to write clearly and well, avoiding an excessively condensed or crabbed style. The editors reserve the right to return to authors manuscripts found deficient in style, form, or clarity.

Manuscripts intended for the Archive should be submitted to an appropriate member of the Editorial Board.

CONTENTS OF VOLUME 68

BEDFORD, A., & D.S. DRUMHELLER, A Variational Theory of Immiscible Mixtures 37

BREUER, S., & J.J. ROSEMAN, Integral Bounds on the Strain Energy for the Traction Problem in Finite Elasticity 333

BROWNE, R.C., Dynamic Stability of One-dimensional Nonlinearly Visco-elastic Bodies 257

CAFFARELLI, L.A., & A. FRIEDMAN, The Dam Problem with Two Layers . 125

CARLSON, D.E., On Some New Results in Dimensional Analysis 191

CHANDRA, J., V. LAKSHMIKANTHAM & S. LEELA, A Monotone Method for Infinite Systems of Nonlinear Boundary Value Problems. 179

DRUMHELLER, D.S., see BEDFORD, A. 37

EMMERTH, I.B., On the Existence of Solutions of a Non-Linear Differential Equation with Delay 155

FABRIZIO, M., Problemi di Unicità per le Equazioni di Navier-Stokes in Domini non Limitati 171

FRIEDMAN, A., see CAFFARELLI, L.A. 125

HAGEDORN, P., On Non-Conservative Systems with Ignorable Coordinates 89

HORGAN, C.O., Plane Entry Flows and Energy Estimates for the Navier-Stokes Equations 359

IOOSS, G., H.B. NIELSEN & H. TRUE, Bifurcation of the Stationary Ekman Flow into a Stable Periodic Flow 227
